A Physiology Course, History Change, Announced

One day registration of all old students will take place on Mon-
day and Tuesday, January 30. Dr. Harry Hartstein announced. New
students will register on Sunday, January 29. A day before the
beginning of spring semester.

This initial attempt to complete registration on a single day will
be made in the pur-79
pose of having the Heads of Departments, the Faculty Authorities and 99 more.
Each of the Faculty advises the students in the selection of pro-
grams as well as aid in the actual registration. In order to facilitate matters, students can purchase book tickets make all arrangements with the year before the 10th of January. A bursar certifies and a high
reporting that the student has taken a physical exam-
manship this year or has arranged for a physical exam before January 15th. It is required of each student before he is
permitted to register.

Because a majority of the students leave from City College, Dr. Michael Kayser of the Mathematics Department will offer no courses next semester. Arrangements have been made for Junior admission for the course to be given by Professor Head.

A new course in physiology given by Dr. Shelley Mishkin, Senior will be featured by occasional lectures by outstanding men in the field. Dr. Alexander Littman will offer his annual course in logic. Dr. Hartstein announced.

Caesara To Move To New Location

Students will have a greater opportunity to use their special dis-
count cards for “Julius Caesar” and “The Shoemakers’ Holiday”
when the Mercury Theatre moves its reports to the Performing National Theatre, 41st Street, West of Seventh Avenue, a limited run of six weeks.

This move considered necessary because of the overwhelming complaints from students and other theatre-
goers who have been unable to secure the current hits at the Mercury, will permit the students to use these cards because of the larger seat-
ing capacity of the National Theatre.

With the special cards, students and faculty can purchase $2.50 tick-
ets for $1.51 tickets for $2.50, $1.50 tickets for $1.25, and $2.30 tickets for $1.50.

The Mercury Theatre itself, where “Julius Caesar” and “The Shoemakers’ Holiday” were launch-
ed, will house the Mercury’s new Sunday Week production “Dear Abigail,” and will be used for re-
hearsals for new productions such as Henry IV,” parts 1 and 2, and “King Henry VIII.”, both of direc-
tion of Oscar Wigs. The Fa-
staff will be presented as a single group in “Caesar” and “Shoemaker” at the Mercury Theatre, later in the ses-
tion.

Students Graded

The day’s last session for all. History and 99 seniors will be Tues-
eday, January 31. A day before ex-
aminations begin, according to the changes in the senior examina-
tion dates as indicated in the original schedules. Freshman and Sophomore classes will have regu-
lar examinations Sunday, January 3.

Resulting from the fact that upper classes will have no classes during examinations, is a change in the schedule itself and several tests will be held on Sun-
day and Monday mornings.

The move was a result of student demands for the alleviation of the burdens of the Juniors and Seniors. The schedule consists mainly of se-
mi-weekly.

An advanced schedule of the semester examinations will be found on page 4. Course numbers are those of the 1937 catalogue. Odd course numbers may be found in parentheses.

Library Society Is Organized

The formal organization of the long-awaited Friends of Yeshiva College took place last week, President of the Friends of the College, announced.

The society, which is offering a club for alumni, is being formed for the purpose of increasing student interest in the study of physics and physiology. In the course of the lecture, Dr. Marvin Rose, President of Friends of Science, will present a number of exhibits from each of the five books of the Bible as evidence for assertions.

The Basis For Success

The appointment of Prof. Isaacs fills a long-felt need in Yeshiva for a responsible person to assume the duties of a dean, and we wholeheartedly commend it as such.

One of the conditions which made an appointment imperative was the urgent necessity for a man who could introduce a spirit and adoration of all with whom they came in contact.

The example of these men, whose work was often carried on in the face of opposition from the administration, serves to emphasize all the more the necessity for a change in the present faculty-administration relationship. The problem of introducing such a change has never been considered a simple one, especially under the conditions peculiar to Yeshiva.

We are confident, however, that Dr. Isaacs, in whom the faculty has displayed its faith in the past, will recognize, as any honest person must, the conflict inherent on the part of various faculty members, and will in his new administrative position introduce a truly cooperative spirit between these two divisions. From this most inevitably follow the cooperation of the faculty, to the end that it may occupy, with a greater measure of independence, its rightful position in the Yeshiva scheme of things.

We maintain that the problem of establishing the proper relationship between students, faculty, and administration cannot be overemphasized, for its solution must become the basis of all future development, and, therefore, it clearly follows, upon it is due, to a greater extent the success of Dr. Isaacs' term of office.

Finally, it is significant to point out that we have never looked upon the appointment of any man, nor the filling of any position as a means to an end which would, in and of itself, cure the ills of Yeshiva, least of all when the very title of the position has been the cause of much speculation and unfavorable comment on the part of faculty, alumni, and students.

We have rather regarded such an appointment as a prerequisite to a broad and extensive program which would, through the course of years, contribute significantly to the institution. This step has been taken we judge the fullest extent of our cooperation, and anxiously await its results—to be measured in terms of the welfare of Yeshiva.

An Essential Improvement

The progress of the library has been a concern of the student body from the first days of Yeshiva College. The administration, too, has had it indicated that they are aware of the problem. Unfortunately, however, there exists a condition in that department which tends to nullify and invalidate much of the good work which has already been done. This condition is the library lighting system.

The total inadequacy of the present facilities makes prohibitive any reading or writing whatsoever, without the student unaided, severely straining his nature which may well be said to leave an indelible impression upon his visual organs.

Without launching into a long and detailed dissertation on the vital necessity of guarding the health of the Yeshiva student in every detail, it should be sufficiently emphasized that after having paid verbal homage to this thesis the administration should see fit to apply in practice a preventive measure, the immediate adoption of which cannot be overemphasized.

If the library is to fulfill its position as an integral part of the institution, if those facilities which long years of student effort have made available are to be used to their fullest extent, and if the health of the student is to be preserved—

The library lighting system must be made adequate.

Previews and Views

By Jacob Goldman

Harvey Pinney in a recent article in the New York Times termed the Ford Sunday Evening Hour a musical sandwich the meat of which is the brief but strong phrases of the intermission. Mr. W. J. Cameron whose honor it is to repeat as a parrot the individualists, anarchists, and extreme socialists of the world. Ford's destiny, his future, his Edel... . . . . ,. has even attempted to spice this meat with a little variety.

But, alas! of late that same meat appears more and more as a non-Kosher muton. Recollectable to a certain degree. Fordism—as a record of sentiment of America's sixty families can be respected as such even if it is velled conservatism.

True, there is not much to be said for the B. F. Cameron of the nation's future. The Ford Empire takes the liberty—or rather resonates the echo—of reflecting on the young people, its attempt to shake a state of affairs much too to be feared is at hand.

Politics and Business must be independent of each other, said Mr. Cameron, and not considered worthy of such tattological speeches. That was when the government, through its various alphabetical agencies, was encroaching slightly on Ford territory. Last week, faced with drastic conditions, the philosophy was reversed. Now, insists Mr. Cameron, "the fat old men... have a lot in common. And for the country to overcome all obstacles and to do what the people must, of necessity, gain sufficient confidence in the business men to allow them to control politics."

The talk which included these remarks was more or less in the nature of a reply to a speech made by Mr. H. H. Parnell, and we commend it as such.

In the course of these comments, Mr. Cameron has pointed out that in the past there have been instances where the students cooperation in the annual Peace Day Strike, our student leaders, advocates of the American Student Union, and the National Federation of America as true, representative sign.

In the face of such conditions and problems on the part of any group is to be vigorously discouraged. Apathy, the easy and readily possible cause of much harm and is to be feared as greatly as an actual destructive force.

In the Editors Mail Box

To the Editor of the Commentator,

Dear Sir: The A.S.U. controlled by the Socialistists, is no longer a wide united front organization which fights against Fascism. The recent convention of the A.S.U. ratified the new constitution which forbids any interference and refusal to support any war conducted by the United States, and substituted the reactionary policy of Collective Security, which is certain to bring about the downfall of the International. This means that the A.S.U. supports the "democratic" saturated imperialistic, capitalist, and imperialistic war. It also means the grey imperialist war, just as the Imperialist war in the Boxer Rebellion. All that is wrong against the Kaiser. In 1914 we fought "to make the world safe for democracy". In 1922 we fight to make the world safe for Fascism.

We should, therefore, "break" the A.S.U. as an open propagandist of Fascism and the Boxer Rebellion. We should put all trust in our canvassers, distribute the "What's Ahead" and "The Secret of the Navy" during the "glorious" war, who endures the lives of millions in order that we may keep peace.

To the Editor of the Commentator,

Dear Sir:
Time Out
BY MORRIS L. LANDIS
A Bit O' Cheer
On those memorable occasions when you got a chance to tick your varsity hooperets hoop it up, I noticed a peculiar attitude on the part of the spectators. They fidgeted too much. They often moved uneasily. They squirmed irritably. They seemed to be searching for something. Discovering no reason for this strange behavior, I called Dr. Ugas to my aid.

"Attention due consideration, careful analysis of the situation, and some heavy pondering," the docotor divulged his findings. According to the ordule professor, everyone but the extreme introvert wants to be a participant rather than a spectator. He wants to feel that he too is in some way contributing to his environment. During a basketball game, he was moved by the same positions by cheering on his mates.

Yeshiva, however, is sadly deficient in such collegiate paraphernalia. To cheer on his mates, a professor improvised one of his own, which is sung to the tune of "The Policeman's Chorus" from the Gilbert and Sullivan operetta, "Pirates of Penzance." And by the way, amsacks loudly of said composition:

Listen to Yeshiva's cry, Hanitaehone, Hanitaehone, Meaning never to say die, Hanitaehone.
When we're on the field of Borden's, Hanitaehone, Hanitaehone, We will fight with all our life, Hanitaehone, Hanitaehone, For, when threatened with defeat Hanitaehone, Hanitaehone, We will strive for victory's seat (Hanitaehone), Hanitaehone.

There is nothing brings it nigh Like Yeshiva's victory cry, Like Yeshiva's victory cry. Yeshiva. Now, Yeshiva's basse-propound does get it nigh (Hanitaehone), while 'ise Last airs his falsetto with: Go, Yeshiva, on to heights. Their ye win not all your fights, Yet will strive with all your might. 

Strive for victory! The rumbling of the basses rumbles itself out. With due regard to Prof. Ugas, I believe that there are better cheerleaders present amongst you out there than can ever be. So, why don't some of you write your cheers in to me personally and sign your names to them so that I can give them the credit they deserve. But, please, no poems. "Voices in The Dark". Rather, take them out to the sun and get a new slant on life.

Hudson Trips Yeshiva Team in Slow Game

Lack of Tall Players Is Great Drawback To Quinpoolees

By Gil Klaparian

Yeshiva, which came away with a winning streak was snapped last week by the Hudson College Quinpoolees on the latter's court. Our boys were humpered continuously by the tall men of the opposing squad, who, by virtue of their height, received the ball after every try at the basket. Despite the fact that Julie Mager and Morty Schloen were out with colds and Able Avreich developed a "charlie horse" at the beginning of the game, the Blue and White put up a nice fight, keeping the game dead heat.

The game in general, though it was played at a slow pace, the Yeshiva team shaping up finer form than it has been for a long time. This can be proven by the fact that a regular team that played last week was trimmed down by the Hudson boys by the score 52 to 19. The outstanding player, that stands out as the greatest fault in our team is the lack of tall players. On our court, with its low ceiling, a zone defense is sometimes effective even when played by our short men, but in a regular high-ceilinged gym our boys are bewildered. They are capable of four games being played on the home court has limited their ability to lay-up only, and they can offer at best a poor defense to tall men who pass above them, which is a bit of height and some practice as a high court, the Blue and White could surely turn out a fine team despite the lack of a few. As it is, if the varsity lives up to expectations in the next game, which is with John Marshall's College of Law, the lawyers will be in for a little surprise in the form of a basketball uprising.

Y. C. Chess Club To Run Tournament

A chess tournament, whose purpose was to make chess as a vital extra-curricular activity of the student body, will be inaugurated by the club the week following the semester.

The proposed tournament is open to beginners as well as to experienced players and all students interested in learning the game. The tournament will be captained by Lawrence Charney '38 or Ben Silcott '37 as soon as possible.

In addition to the scoring series of matches, a detailed program, which will include lectures by prominent masters on the theories of chess, has been arranged. The cooperation of the students is essential for the creation of a successful club, and for the growth of an efficient team, Charney emphasized.

APPOINTMENT OF ISAACS REVEALED

(Continued from page 1.)

"Isaac" is a name which has contributed frequently to the Journal of Bacteriology, including his distinguished work on the related bacteriology, which is edited by Prof. Leo Jung, head of the Department of Bacteriology.

In the last issue of "Isaac's" journal, there was a second subject on publication in that series in the near future.
