Create Yeshiva Senate To Recommend Policy

A University senate and executive council has been instituted to aid in the formulation of recommendations to the President concerning educational policy and other University affairs, disclosed Dr. Bacon, dean of Yeshiva College. The powers, duties, and privileges of the University senate and the executive council are under the jurisdiction of the President of Yeshiva University, who is ex-officio member of all committees.

Senate's Functions

Functions of the Senate include the following:

A. To formulate and recommend to the executive council for transmission to the President, policies pertaining to student welfare and activities.

B. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

C. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

D. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

E. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

F. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

G. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

H. To review periodically for all degrees and certificates granted by Yeshiva University, and to make appropriate recommendations to the faculty concerning the policies which are specific to a college or school to its faculty.

Charity Drive Is Begun For Maimonides Institute

The Yeshiva College Drive for Charities, conducted by the Student Organization of Yeshiva, announced that it has begun a collection for the Maimonides Institute, a non-profit agency dedicated to the education and rehabilitation of mentally handicapped children. The goal of the drive, which will be held for a four week period, is set at $2500. Each student of the high school and college has been asked to donate $2.00, and each Simcha student $5.00, the money to be given to his class representative.

The Maimonides Institute, located on 75th Street in Middle Village, N.Y., is unique in that it integrates religious education within its rehabilitation program. Currently the Institute boasts a nursery for children from 4 to 6, a day school for ages 6 to 16, and a class for prevocational training for young adults. The program stresses remedial education for students who are deficient in the area of study.

Medical And Dental Awards Go To Four

Three New York State Regents medical scholarships and one New York State dental scholarship were awarded to four Yeshiva College Seniors for graduate study in the medical and dental schools of their choice.

Recipient of the highly coveted medical scholarships were Sheldon Mirov '63, Martin Rosman '63, and Leonard Zimmerman '63. Myron Sokol '63, winner of the dental award, has decided to attend Yeshiva medical school and has declined the stipend.

Council To Request $3,000 In Funds

Student Council will ask for an annual $3000 stipend from Yeshiva University's administration in exchange for complete rights to the school's vending machines. The motion was passed at council's last meeting, Wednesday, December 19.

Included in the resolution was a motion of gratitude requesting the school to increase the sum should the school enrollment increase in future years.

Joseph Rapaport '63, president of Student Council reported that, in speaking with Dean Bacon, the proposed plan had been sought as a possible solution to the problem of the vending machines. President Rapaport stated that although the recent boycott of the cafeteria has not been successful, negotiations have continued.

One hundred Regents scholarships are given annually, of which seventy-two are for medical studies and twenty-eight for dental studies. The award covers all four years of graduate school. The stipend ranges from $350-1000 per year depending on financial need.

This year over 200 students competed in the examination. The six comprehensive tests included questions on biology, chemistry, physics, verbal aptitude and quantitative reasoning ability.

Sheldon Mirov, a student of JSP, is a member of the physics department. Dr. Rosenman, captain of the chess team and a varsity fencer, attends TI. Mr. Zimmerman, also a member of the chess team, is enrolled in JSP. Edward, in-Chief of the Maimonides, Sokol is also secretary-treasurer of the pre-med club and enrolled in TI.

Greenberg, Lainoff Will Guide Seniors

"A more formal procedure to make guidance available to the seniors is being initiated, accord- ing to Mr. Greenberg, assistant professor of history at Yeshiva College.

Mr. Greenberg informed the Student Council that the seniors will not only receive help in career planning, but also in the present system, students who change their programs after they receive their grades must pay a $4 fee. Also discussed was the survey being conducted by the Senate on the possibility of students having a delegation on speech and language requirements in other American colleges. The object of the research is to show that Yeshiva University is one of the very few colleges that require more than one year of speech for a Bachelor of Arts degree.

Weber Speaks On Thematic Analysis

Dr. Paul Weber, Professor of French Literature at City College and author of works in literature and philosophy, addressed Alpha Omega, the Yeshiva College chapter of Pi Delta Phi, the National French Honor Society, Monday, December 17, at Furst Hall.

In presenting a psychological analysis of the works of Edgar Allen Poe, "the first American writer to have an identity of his own," Dr. Weber contended that "the work of an author is dominated by a single theme which is developed, and he is willing to arrange itself as the author, sometimes directly and other times symbolically." Thematic Analysis

This contention is the basis of Thematic Analysis, a method of analyzing the works of authors developed by Dr. Weber. Thematic Analysis may be used to explain why an author will write a particular work rather than another, or use certain symbols. Thematic Analysis is employed to interpret symbolically words like water and clocks and to show the possible connection between the two. According to Professor Weber, the answer may be found in an incident in Poe's childhood. Edgar was nearly drowned after a fall into a tree in which he had been hiding.

Time And Water

"To the child's mind it was as if time, through the use of the tree, was immovable be- cause if it had been trifled with. Therefore, time and water were undeniably linked."
In any event, we hope that the individuals who will serve on the Senate will always have before them the University motto of Torah U'Madah as they make their decisions and recommendations. Although no official representative of the Seminary will be at the Senate meetings we hope that all decisions will reflect that, in the last analysis, the roots of this University are not in a Graduate School of Education or in a Graduate School of Science, but rather in Yeshiva University, whose 75th anniversary we recently celebrated.

Angles On Marks

The Graduate Record Examination has a colorful, even infamous, history at this institution. Alumni fondly recall the Amen corner, avenue riots and the Lampert Auditorium mar­ble rollings in the days when the examination was used to determine the academic honors given at Commencement. Trademark has made the testing date a Yeshiva Bastille Day and few students take the examination seriously.

The trouble is, though, that the test scores are taken seriously by the unimportant bodies. The Middlestates Association which accredits Yeshiva uses the scores to evaluate the caliber of the institution. The College Administration and faculty try to uncover areas of weakness in the College program by studying the test results and, therefore, go to great expense to pay the test fee for every sen­ior.

Furthermore, graduates have found that occasionally a school or industrial firm will require that the test scores be submitted although several years have elapsed since the testing date.

The value of the degree of every present, past, and future student rises or falls depending on how the seniors fare on these nation-wide exams.

Last-minute cramming is of little value. There being sever­al months until the tests will be administered, we ask the seniors to think of themselves and of all the past and future graduates of Yeshiva, prepare for the examinations, and choose a less significant day on which to release their energies.

Five-Year Plan

THE COMMENTATOR feels it appropriate to bring to the attention of the student body an academic plan which has been in effect for some time but has, to date, attracted little interest.

We refer to the “five year-plan,” instituted at Yeshiva College over a year ago, under which a student, upon meeting certain academic requirements, may reduce his college work load to 12% credits per semester. The decreased pro­gram enables the student to concentrate on his Jewish studies and the fifth year of study is completely tuition-free.

It should be understood that WE ARE NOT IN ANY WAY ENDORSING A COMPULSORY FIVE-YEAR PROGRAM. We feel, nevertheless, that there are a num­ber of students at Yeshiva who might profit significantly from such a program. Interested students should contact Dean Bacon before the end of the semester.

The Commie Stands Alone

THE COMMENTATOR, appearing despite all obstacles which harry its rival metropolitan journals, is making its last appearance for the school semester. An obstacle which has not come under the scrutiny of its rival works its insidious way to keep us on the brink. We refer to the “five-year plan,” instituted at Yeshiva College over a year ago, under which a student, upon meeting certain academic requirements, may reduce his college work load to 12% credits per semester. The decreased program enables the student to concentrate on his Jewish studies and the fifth year of study is completely tuition-free.

It should be understood that WE ARE NOT IN ANY WAY ENDORSING A COMPULSORY FIVE-YEAR PROGRAM. We feel, nevertheless, that there are a number of students at Yeshiva who might profit significantly from such a program. Interested students should contact Dean Bacon before the end of the semester.

The Commentator, appearing despite all obstacles which harry its rival metropolitan journals, is making its last appearance for the school semester. An obstacle which even the Times doesn’t face is rapidly approaching, as we bid a temporary adieu.

It seems apropos at this time to evaluate the power of the press. Interestingly enough during the strike there hasn’t been much interesting or important news occurring in the world. This can only lead to the soundly logical conclusion that the newspapers are responsible for many of the so-called crises. Not wishing to rehash A Nation of Sheep we can only deplore the time that will be wasted and time that was to be used in studying the test results for the examination. Time that could have been in effect for some time but has, to date, attracted little interest.

We are surprised and disappointed though that no official representatives of the Rabbi Isaac Elchanen Theological Seminary have been included on the Executive Council or even on the larger Senate. Though RIETS is not involved in the granting of academic degrees and does not come under the jurisdiction of the Middlestates Association, we feel that any body which will, for example, “formulate and recommend policies pertaining to student welfare and activities” must necessarily include representatives of the Yeshiva.

Letters

Big Brother

To the Editor:

Re: “Sweat from the Students”

Editorial

The “brother” attitude of THE COMMENTATOR which is pleased with the recent resolutions passed by the faculty of the Teachers Institute is the implication as its consequence.

One should not be so zealous about damping one segment of the student body when there are other houses. Those “rabbinical” seniors are in no way unique to TI. That “present conditions leave much to be desired,” can be said of other branches of the school.

Most of all, the “internal changes” deemed so necessary for TI could well benefit other branches of the school.

I would like to point out that on the whole I agree with your comments and only wish to ex­press my disappointment of the “I can’t think of a good way to fill up the editorial page so let’s knock TT’ game.”

Yours truly,

Larry Schulman ’63

Maybe 50 Seconds

To the Editor:

In 1963 and ’64, The* Commentator was allowed in each of its courses unexcused absences totaling two times the number of meetings per week of the course minus one. Under such a system one was allowed to cut a four credit course in five days, ten in ten days, and 50 in 50 days; a one credit course once.

At the beginning of this semester the YC administration decided to permit five unexcused absences in every course. I think it can be safely assumed that the majority of students were appre­ciative, if not overwhelmed, by this unprecedented act of gener­osity.

There is one aspect of this sys­tem that is the number of meetings from the aura of goodness and thought­fulness that originally came about.

The decision of the Committee on Senate Standing Committees that the individual application is never disclosed, consequently, the student never knows where he stands, whether he has more cuts than he is allowed or not. We see that in reality there exists an intrinsically pit­fall in this seemingly “fair for the benefit of the student” program.

I think the administration could alleviate this situation if it would just let us, the students, keep a running record of the students such that the students could impose upon her for maybe 30 unexcused absences or exactly what their scholastic standing is at the present time.

Thank you,

N. M. Mekin ’66

Dr. Moses D. Tendler, associate professor of biology at Yeshiva College has received a grant from the National Science Foundation in support of a Summer Science Training Program for secondary school students.

The program was initiated in 1958 by Dr. Tendler. The lectures are held at the Main Center. The training program is designed to encourage the scientific interest of secondary school students of high ability and to help accelerate the scholarly development of such students by providing them with instruction in scientific matters by scientists of recognized stature.

Students are selected from several hundred applicants on the basis of their interest in and knowledge of science, as well as their general intelligence, poise, and maturity. Courses in microbiology, endocrinology, biochemistry, and other introductory sciences are offered.

Each student attends two hours of lecture every morning given by outstanding scientists who are either members of the University faculty, or researchers currently working in New York City. These lectures are held at the Main Center.

The second annual Sarei Hameah dinner will take place February 10, 1963 at the Rubin Residence Hall. The dinner is sponsored by the Department of Alumni Activities. It will feature Dr. Samuel Belkin, president of Yeshiva College as its guest speaker and will honor Dr. Emanuel Rackman, assistant to the President.

The Sarei Hameah, Alumni Century Club, consists of alumni who contribute a minimum of $100 annually to Yeshiva University. Last year three hundred and thirteen alumni became members of Sarei Hameah. They donated over forty-six thousand dollars to the University.

**Interview with Dr. Ralph Rosenberg**

Dr. Ralph Rosenberg

By Sheldon Plot

In a never-ending attempt to disseminate his rather unique philosophy, Dr. Ralph Rosenberg travels far and wide across the broad expanses of Yeshiva University’s main center. In almost perpetual motion between his headquarters on the North and the South side of that center, he has limited his visits to the various cafeterias in the building and to the home of his friend, Dr. Solomon Blum. 

“They have recognized certain problems in teaching and have done nothing but create new difficulties in trying to solve old ones. The real failure is in the area of guided missteps but in that of guided human beings.”

“Sure, we are so busy giving tests that they have no time to teach. They use language lab machines because they have failed with the human machine. As a result, they turn out students who are excellent memorizers but very poor men and women. Education fails completely when it presents the tools of language to the student and doesn’t train him in the proper use.”

Dr. Rosenberg’s Solution

The solution that Dr. Rosenberg presents for these problems sums up not only his finding in psychology but also his basic approach to philosophy. “Students must be taught not to memorize but to experience problems and think them out.”

“They must be given the academic freedom to examine all the evidence and the independence of thought is basic to the development of the individual. Above all, they must be imbued with the good will that makes language a bridge between men, and not a means of trickery and deceit.”

“To achieve this, the teacher must serve as a model, not only in his actions, for the student can see through hypocrisy, but in every fiber of his being. He must encourage his pupils to learn not only from books, but out of life as well. As Goethe said in Faust, ‘Only that person merits life and freedom who has learned to fight for both day by day.’”

**Campus Chatter**

by David Chassan

The University of Southern California plans to abolish all College of Letters, Arts, and Sciences required courses in order to streamline its curriculum. The move which will effect only the colleges of letters, arts, and sciences will decrease the number of courses given from 3,500 to 2,000.

Under the new system, thirty-two courses will be required for graduation rather than 123 credits. As a rule, students will be limited to a few courses a semester. Courses which previously earned from one to three credits will either be abolished or incorporated into other courses.

The change is geared to eliminate fragmented education. New courses offered at Southern Cal. will be much broader. For example, an American Studies course would include a study in history, economics, government, music, and art.

Yale University has inaugurated a survival program in the event of a nuclear attack. Fifty university buildings have been authorized for the use of shelters. Funds, life saving equipment, and medical supplies have been provided for the entire surrounding community. The government will supply food packages necessary for survival for two weeks along with medical kits and various radiological instruments.

The Iowa State Daily reports that at least 7,000 No-Doz pills are consumed annually during exams. The estimate is the result of a campus drug store survey which discovered that some of the users end up in the hospital to ‘sleep it off.’

The newspaper quoted Dr. John Grand of the University Hospital as saying a student with an overdose is usually hyperexcitable, jumpy, and can’t stand quiet. Grant pointed out that although the stay-awake pill’s instructions say one pill is equal in effectiveness to one shot of alcohol, the true effect of the pills does offer more stimulation.

Dr. Grant suggested that students who smoke cigarettes should remember when they want to stay awake. That way they won’t have the same problem as the danger level is reached.

Harvard may have a chapter of the John Birch Society next year. They are currently discussing the possibility of forming a chapter with sixteen interested students in January to discuss the proposed group charter. Monthly meetings will be held.

The first summer institute in Israel sponsored by Yeshiva University was attended by Columbia University and the National Aeronautics and Space Administration has been described as an overwhelming success. The group was formed by Yeshiva University undergraduates from all over the country studied for a six-week course in the Talmud, and then took a long trip to Hamburgh, Alabama, and Cape Canaveral.

The students were chosen for scholastic background and achievements from a large group of applicants. Their tuition is paid by NASA and each student receives a living allowance of $65 a week to cover expenses.

The Chicago Teachers Union claims credit for developing it very own tie-dye clothing. Filling into telephone booths is already considered old fashioned, the tie-dye looks quite nice in Chicago.

Certain basic rules exist, however. First, the car must contain three in the front seat to the five in the back. Second, after the car is filled, it must be driven around and then unloaded with all participants in walking. Third, sports cars, station wagons, hearses and ambulances are ineligible. Fourth, the windows must be rolled up—no arm or head may hang out the window.

Experienced competitors recommended filling the car by kayak. The present record is 14 for the back seat and three for the front of an old Mercury.

Newspaper Strike Studied: Possible Results Analyzed

The strike of printer's unions against leading New York newspapers has somehow overlooked The Observer.

One would be tempted to pro-claim a general lamento at our peri-

dic loss of the news media were in best form, in general, it is no great loss.

With few exceptions today's pa-

pers have substituted sensuality and reports of barroomists for news-ports and intelligent news analysis.

What's That Film

On the other hand anyone who thinks that "all the news that's fit to print" does not "have to be bor-

ing" must have long since given up reading.

The contemporary newspaper traces its origin to the Actadu-

na, "daily events," published in ancient Rome. More recently, American journalism began in Boston in 1690. In both those years the government sup-

pressed newspapers. Using our modern yardstick, we easily under-

stand these actions, and even find them commendable.

Noel Long After

Newspapers were not to be long kept down. Only 10 years later, again in Boston, the local postmaster became editor of the,

30 Will Attempt

To Check Champ

Samuel Reshevsky, International Grandmaster, will demon-

strate his renowned abilities as he plays 30 Yeshiva College stu-

dents simultaneously in an exhi-

bition to be tacked up by the VC Chess Team and scheduled tentatively for January 9th.

Now competing in the U.S. Championship, Reshe-

sky is facing such stiff competi-

tors as Fisher, Sherwin, Evans, and Benko. All those wishing to match their wits against one-thir-

tieth of the Grandmaster's are asked to remember that the last time Mr. Reshevsky performed a task of this magnitude, he beat all 30 of his opponents. Those who are still game, however, may contact Mossey Frankel or Rosenman of the chess team.

In scheduled chess varsity play in the coming weeks, the team will come up against some fine local opponents in the New York City

Intercollegiate League.

Preston Comments

Included in his observations were: "Louis Nye is the funniest guy in the world," and "France is a lady, Italy is an old lady, and England is a checkerboard." He even had a good word for report-

ers: "If John Barrymore were a reporter, he'd probably be known that be drunk." M. W.
Students Donate 157 Pints In Annual YC Blood Drive

One hundred fifty-seven pints of blood were donated by Yeshiva College students and alumni to the Red Cross Blood Bank in the annual Fall Blood Drive, held Wednesday, December 19, in the Students' Life Building.

The drive was held from 11:00 a.m. to 2:00 p.m., and the blood was collected by members of the Student Council Blood Drive Committee.

Letters To the Editor

To the Editor:

"Lyman Yamin and Hoda Farni, Levov Chokhmim."

The meaning of the words of the psalmist stand forth in the world and the work of Dr. Arnold Lowan. He was a computer and measured the psalm in inches of the Kingdom. He worked with infinites. One is led to think of the transcending phrases: "Eine Mogen Ludahschin, L'chaim Shalom Yisrae." Yet his universe of numbers, figures, and symbols had another kind of beauty that he felt even more deeply the finiteness of human knowledge, which brings us to mind Isaac's words: "Mi Ma'alot Be'tshu'a Majim." It is part of the destiny of Yeshiva to give haven and refuge not only to students from distant lands but also to teachers and alumni. Dr. Lowan fled from the Old World cruelties. As a young man he left Yaffa, when Roumania was in the grip of the Iron Guard. He brought with him his cheder heritage. In Yeshiva College he had the courage and opportunity to establish a research laboratory—The Gerosky Institute and March Center. In a figurative and actual sense Dr. Lowan's vision and scientific endeavor bear the imprint of the words of the psalmist: "Limon Yamin, Kain Hoda, Farni Levov Chokhmim."
**Yeshiva Wrestling Team Drops Three In A Row**

The Yeshiva Wrestling Team, under the tutelage of Hank Wienerberg, has begun the season with a rather unimpressive string of matches, losing to CCNY, OCC, and Seton Hall.

A few minutes after the squad's arrival, co-captain George Brown, 123 lbs, was wrestling. The first take-down was credited to George and from that point on he held the lead. In the third period he

The optimism that prevailed before the season started is still justified. The talent of the squad has not suddenly disappeared and there is certainly nothing wrong with the play patterns. If we execute them and thus make the most of our ability, the season can still be a successful one.

Although the team has gotten off to a slow start, there are some bright spots. We are getting solid performances from Artie Aaron, Steve Gralla, and Neil Katz. Aaron continues to score well, averaging double figures, and is now more prominent on the boards. He is also adapting well to Coach Zarachek's deliberate style of play.

Gralla and Katz are both playing fine all around games. Steve is working for his slot and getting his share of rebounds. Neil is doing a fine job each game, and his consistency is showing through.

As a result of Yeshiva victories in its first two matches of the season, Fencing Coach Arthur Tauer is slowly drawing closer to that coveted hundredth victory. The magic number has now been reduced to two for exclusive claim.

The Saber squad at the American Athletic Conference meet, from Jan. 5 to 6, is named Kenny Jacobson; son Neil, now attends YU and plays a lot of intramural ball. The Sabers will be content to take it easy while dominating intramural play. After a five-game winning streak and after he returned he gave up varsity competition. Stu had the lead.

Mr. January has been a make-up man at all basketball games this term. It is little wonder since he played for the varsity five as a sophomore. It was thought then that he could be the big man that YU has always lacked. At 6'7" and a solid 200 pounds, Stu not only has size but mobility as well. He can rebound under the boards and also shoot from the outside when necessary.

As a Soph, he virtually beat Farleigh Dickenson single-handedly and Coach Berger with his long shots from the corner. Stu then went to Israel but while there he came down with scarlet fever. The resulting lay-off made it difficult to get back into shape and after he returned he gained a reputation. Stu is content to take it easy while dominating intramural play. After a satisfying performance, he smiles from ear to ear and looks bigger, if that is possible.

As the season started, Irvin "Red" Blumenreich set a number of Yeshiva basketball records in 1954-55. He scored 44 points in one game and 182 for the season. The following year he landed a berth on the all-city second team of New York sportwriters and in 1956-57 received honorable mention on the Associated Press Little All-American team. He is one of five men to score over a thousand points in their careers. As a freshman, Under '63, leads the group, followed by Blumenreich, Abe Sodden '56, Sam Grossman '63, and Mayr Herschkowitz '53.

Kevin Enker '62, in fencing, compiled the incredible record of 46-2 in his last year and Jack Merkin '63 was 11-1 while wrestling at YU.

In the 1944-45 season little Yeshiva defeated NIT-bound Fordham 42-35. The Rams never made it to the Garden after that... The first captain of YU's basketball team was Rabbi Irving Koslowe whose son Neil now attends YU and plays a lot of intramural ball... The manager of LII's freshman basketball team is named Kenny Jacobson; does name sound familiar?

**COOPER COPER: Bob Cooper ups his adversary in Dec. 20's encounter with the City College grapplers.**

When the Yeshiva grapplers played host to CCNY December 20, they suffered defeat by the score of 32-0.

In the first match, George Brown, 123 lbs, fought hard but was pinned in the second round. Wrestling at 130 lbs. Harold Wafstrom took an early lead with a take-down. Late in the second period his opponent reversed and took the lead. In the last round the lead changed hands twice. City College won by one point.

Leifer and Pruzansky Downed

Leifer, 137 lbs., was always in danger of being pinned. After a tough fight, City won on points. Joel Pruzansky, 147 lbs., tied his match in the second period, but his opponent scored heavily in the last round and won on points.

Moishe Siev, 157 lbs., was taken down early in the first period, but escaped. In the third round his opponent reversed and pinned Moishe. Bob Cooper, 167 lbs., took an early lead with a take-down and an escape. His more experienced opponent pinned Bob in the second round.

Senior Class Team Wins Four Straight

Scoring their fourth straight victory, the seniors walloped the fresh five 54-27 in an intramural game played December 11.

The seniors jumped off to an immediate 10-0 lead behind Steve Harris and Norm Bergman. The Senior's zone defense combined with Harris' rebound efforts put the game out of the Yeshiva's reach before the end of the quarter. Bruno Bieler scored the frosh's first goal with 1:10 left. This signaled a small frosh spurt and the quarter ended 14-6 with the frosh way up.

The second quarter began with four quick senior baskets. The frosh valiantly tried to solve the upperclassmen's tough zone but could only manage four baskets and the half ended 25-17.

In the third period the seniors ran away with the game. Baskets by Josh Werblisky, Bergman and Harris put the upperclassmen ahead 35-17. Sloppy senior play ensued. Their lead was cut to 35-23 at the end of the third quarter. In the fourth quarter, behind the rebounding of Abba Borowitz and Harris and the fine playmaking of Werblisky, the winners attained an insurmountable victory margin.

Harris capped scoring honors with 20 points followed by Bergman's 13.
